IDT NAMES DAVE CÔTÉ VICE PRESIDENT OF MARKETING

SANTA CLARA, CA, May 14, 1997—Integrated Device Technology, Inc. (IDT) recently named Dave Côté vice president of marketing. In his new position, Côté is responsible for developing and executing the company's strategic product marketing plans as well as establishing IDT's corporate positioning.

Côté oversees IDT's strategic marketing, market research, business development and corporate marketing divisions. He is also actively involved in driving IDT's sales organization to meet the needs of its customers and in working with industry influencers to effectively position IDT in the market.

"We welcome Dave to the IDT team, and I am confident IDT will benefit from his vision, inspiration and marketing leadership," said Ray Farnham, IDT's executive vice president. "Dave's valuable marketing skills will help IDT develop its aggressive, long-term strategies for both product and market development."

Côté comes to IDT from Zeitnet, Inc. (now a Cabletron company) where he was vice president of marketing and customer support responsible for product marketing, marketing communications, demand creation, channel marketing and customer support. He also brings marketing experience from Bay Networks where he played key roles in product, corporate and channel marketing. Prior to working at these companies, Côté spent eight years at Apple Computer, Inc. in various senior marketing positions.

"Dave's networking and communications experience is extremely valuable as IDT continues to support communications markets with more than half of its products," said Farnham.

Côté received his bachelor of science degree from the University of California at Davis and his master of business administration from California State University at Sacramento. Côté and his wife have two children and reside in Los Altos Hills.

Electronic Media Program

Information about IDT and its products is easily accessible through IDT's comprehensive electronic media program, which includes free CD-ROMs by calling (800) 345-7015, a Home Page on the World Wide Web (<http://www.idt.com>), and fax-on-demand services by calling (800) 9-IDT-FAX. For more information about these services, call (800) 345-7015.

About IDT

Integrated Device Technology, Inc. (IDT) designs, manufactures and markets high-performance integrated circuits and modules that are used in products in four rapidly growing market segments: communications equipment, such as routers, hubs, switches, cellular base stations and other devices; distributed computing systems, such as workstations and servers; personal computers (PCs), desktop and notebook; and office automation equipment, such as laser printers and color copiers. IDT enhances the opportunity of its customers to optimize the cost and performance of their microprocessor-based systems by providing innovative solutions based on four product areas: communications products, including industry-leading FIFO memories, multi-port memories and Asynchronous Transfer Mode (ATM) products; high-speed SRAMs and Fusion Memory™; high-performance logic; and RISC microprocessors, optimized for both embedded as well as reprogrammable applications. Headquartered in Santa Clara, Calif., IDT employs approximately 4,400 people worldwide.

Fusion Memory is a trademark of Integrated Device Technology, Inc.
