# 3M™ Privacy Screen Protector for Apple® iPhone® 6 Plus

3M™ Privacy Screen Protectors allow mobile devices to be used privately in public places without revealing confidential information to prying eyes. User sees the information on the display while people on either side of them see a darkened screen.

- Use your mobile device in public without revealing confidential information to people on either side
- You will see the information on your display while people on either side only see a darkened screen
- Custom fit to your Apple® iPhone® 6 Plus
- Privacy in portrait; change device orientation to share
- Please note: The cover glass on the iPhone 6 and 6+ is curved at the edges. To adhere properly to the screen, 3M screen protector products were designed to cover just the active display portion of the phone; it does not extend over the curved edges. This design helps minimize premature lifting of the protector on the curved edge. Again, 3M screen protectors cover the entire display portion of the phone and also have custom cut outs for sensors and Touch ID for a seamless design.
- Dry application
- Stay-clean edge technology prevents dust and grime from collecting on the edges of screen protector
- Protects display from dirt, debris and scratches
- Removes easily; leaves no residue.
- Cleans easily with a soft cloth and water.
- Limited 1-year warranty
