

Ratcheting Crimper Pliers - #18-28 AWG

PRODUCT ID: 1213

Make cables and wiring harnesses with ease using smooth ratcheting crimpers. These precision machined crimpers will turn you into a pro, no more painful struggles with pliers and generic crimpers that smooch your contacts so they won't fit properly. Once you've pressed enough, the ratchet releases, so you know when you've applied enough force.

This model will work best for smaller common connectors, from 0.1mm²-1.0mm² / AWG #18-28 - all those frighteningly small contacts used in fine pitch connectors.

There's three slots and you can sort of eye-ball which one will fit your contact best. Can do female/socket or male/pin crimps. Check this document for some guidelines on good crimping hygiene.
