

USB 3-Way Charging Cable - iPhone 5/iPhone/iPad and MicroUSB

PRODUCT ID: 1514

. Description

For charging nearly any kind of portable gadget, this 3-in-1 cable can handle it. Great for use with a Mintyboost, or our USB power packs (or just powering your projects). One USB-A jack splits into three connectors: Micro USB, iPhone/iPad/iPod 30pin (for older iDevices) and the newer Lightning (newer iDevices).

Approximately 6" long from end to end, it's a little more compact than our classic 3' long cables.

Keep in mind, This cable does not contain a hub, so you should only connect **one** USB device at a time (to either end).

- The Lightning end has data **and** power
- The 30pin iPhone/iPod has only power connection
- The MicroUSB end has only power connection

Does not work with iPhone 5s or 5c

. **Technical Details**

- Wire Length: 152.4mm / 6"
- Weight: 10.16g
