

Feather Stacking Headers – 12-pin and 16-pin female headers

PRODUCT ID: 2830

DESCRIPTION

These two Female Stacking Headers alone are, well, lonely. But pair them with any of our Feather boards and you're in business!

What do they do? They stack. Put the headers through your Feather and then you can not only plug them into a solderless breadboard, but you could attach circuitry on top as well

Note: Comes with one 12-pin and one 16-pin header, Feathers not included
