

At the Feather Huzzah's heart is an ESP8266 WiFi microcontroller clocked at 80 MHz and at 3.3V logic. This microcontroller contains a Tensilica chip core as well as a full WiFi stack. You can program the microcontroller using the Arduino IDE for an easy-to-run Internet of Things core. We wired up a USB-Serial chip that an upload code at a blistering 921600 baud for fast development time. It also has auto-reset so no noodling with pins and reset button pressings.

And for more information on how to run Azure, check out the Microsoft Azure site!

You can also DIY your own t-shirt - as seen in the Microsoft /Build Keynote with our flexible matrix!

Note: **As of April 18th, 2016** this product is no longer shipping with a Lithium Ion Battery. You can add one to this product separately.

This kit includes:

- 1x Assembled Adafruit Feather Huzzah ESP8266 WiFi
- 1x Micro Servo
- 1x PIR (motion) Sensor
- 1x USB Cable - A/Micro B
- 1x Fast Vibration Switch
- 1x Magnetic Contact Switch (door sensor)
- 1x Half-sized Breadboard
- 1x Premium Male/Male Jumper Wires - 40 x 6"
- 1x Magnetic Contact Switch (door sensor)
- 1x DHT22 Temperature-humidity Sensor + Extras

Component bag containing:

- 3x 12mm Tactile Switches
- 1x Breadboard Trim Potentiometer 10K
- 1x Diffused 10mm Green LED
- 1x Diffused 10mm Red LED
- 5x 10K 5% 1/4W Resistor
- 5x 560 Ohm 5% 1/4W Resistor
- 1x Piezo Buzzer
- 1x Photo Cell Light Sensor
- 1x Diffused RGB (tri-color) LED
- 1x Breadboard-friendly SPDT Slide Switch
