

Kano Screen Kit

PRODUCT ID: 3256

Description

Are you interested in understanding how a screen works? Here's a great way to learn by making one of your very own!

The Kano Screen Kit is a portable, playful HD display that you build yourself. It's a new make-it-yourself moment, to demystify the display, and take Kano portable. A creative way to learn for kids and big kids, the Screen Kit has a unique modular design. It's also perfect if you're just looking to complete your Computer Kit. No prior knowledge is needed, and the Kano Book -- a step-by-step storybook -- is provided to help guide you.

Kit includes:

1280 x 800, 720p, 10.1" LCD screen

Stand

Button board + wafer cable

Magnifying glass

HDMI cable

Power cable (mini-USB Y-splitter)

Storybook

Stickers

Some children between 6–8 years old may require parental supervision when reading the Kano Book and assembling the Screen Kit components. Children 8 years and older are proven to be quite self sufficient on their Kano!
