BXB150 Series

DC/DC CONVERTERS 100

100-150W Wide Input DC/DC Converters

- MTBF >1.4 million hours (Bellcore 332)
- Input voltage to ETS300-132-2
- · Adjustable output voltage
- No minimum load required
- · Separate case ground pin
- · 2:1 input range for battery powered applications
- Undervoltage lockout (UVLO)
- UL, VDE and CSA safety approvals

The BXB150 Series are high power density DC/DC converters packaged in the industry standard footprint (2.40 x 2.28 x 0.50 inches) to give designers optimum choices when specifying for both new and replacement designs. Suitable for a wide range of applications in nearly any industry, the BXB150 was particularly designed with communication and distributed power applications in mind. Using Bellcore 332, the MTBF is greater than 1,400,000 hours. Aluminum baseplate technology with four threaded M3 inserts makes heatsink attachment and optimum thermal management easy. The BXB150 series is approved to IEC950 by UL, CSA and VDE.

- 1 Measured with 10 μF tantalum capacitor and $1 \mu F$ ceramic capacitor across output.
- 2 di/dt = 0.1A/1µs, Vin = 48VDC, Tc = 25°C, load change = 0.5 lo max. to 0.75 lo max. and 0.75 lo max. to 0.5 lo max.
- 3 Units should be characterised within systems. External components required.
- 4 Input fusing is recommended based on surge current and maximum input current.
- 5 This product is only for inclusion by professional installers within other equipment and must not be operated as a stand alone product.
- Simulated source impedance of 12µH. 12µH inductor in series with +Vin.
 Active high remote on/off option is available (standard product is active low), designate with the suffix 'FHT' e.g. BXB150-48S05FHT. Consult factory for further details and options.
- 8 Start-up into resistive load.
