

CXA10 Series

Single and dual output

- 4:1 input voltage range
- Approved to EN60950, UL1950, CSA C22.2 No. 950
- Operating ambient temperature of -40°C to +70°C in still air
- High demonstrated reliability with conservative component deratings
- Complies with ETS 300 019-1-3/2-3
- Complies with ETS 300 132-2 input voltage and current requirements
- Fully compliant with ETS 300 386-1
- Pin compatible with NFC10 and BXA10 series
- Basic insulation system (input to output)

2 YEAR WARRANTY

The CXA10 series comprising of five different models delivers single and dual output voltages covering 3.3V, 5V, 12V, $\pm 5V$, ± 12 and $\pm 15V$. The series has a wide 4:1 input voltage range of 18 to 75VDC. The CXA10 has been designed as a competitive open-frame alternative for the communications market. The product is supplied in the industry standard footprint of 2.0 x 1.0 x 0.394 inches. Other product features include overvoltage protection, short circuit protection and remote on/off. All components are placed in a fully automated environment. Planar magnetics are used in the design to improve the reliability and reduce the profile of the DC/DC converter. The series has full international safety approval to EN60950 and UL1950 reducing system compliance costs, and it has a basic insulation system from input to output making it suitable for a wide variety of applications.

All specifications are typical at nominal input, full load at 25°C unless otherwise stated

Notes

- Negative output voltage deviation when positive load is changed.
- Guaranteed minimum output voltage range.
- TVS spec: See Application Note 100 on our web site.
- On dual output models, OVP protection is on negative outputs only.
- With respect to minimum input voltage.
- With one external ITW Pakttron 4.7µF film capacitor across the input.
- For units with optional remote ON/OFF, please add the suffix '-S' to the model number, e.g. CXA10-48S05-S. Additional alphanumeric suffixes maybe added to indicate minor modifications not affecting the safety approvals.
- Unit provides basic insulation up to the 75VDC maximum input voltage.
- Maximum continuous output power not to exceed 10 Watts. 7.9 Watts for the 3V3 model.
- User must provide 1.5A in line fuse in order to comply with safety approvals.
- Maximum temperature on components Q100, CR101, CR102 not to exceed 120°C. See Application Note 100 for details.

CAUTION: Hazardous internal voltages and high temperatures.
Ensure that unit is not user accessible.
