

EXB30 Series

Dual positive output

- Two independent positive outputs
- Output voltage tracking
- High efficiency
- Approved to EN60950, UL1950, CSA C22.2 No. 950
- Operating ambient temperature of -40°C to +70°C (natural convection)
- Up to 100% load imbalance
- Separate trim on each output
- No minimum load
- Complies with ETS 300 019-1-3/2-3
- Fully compliant with ETS 300 386-1

The EXB30 Dual series are isolated dual positive-output DC/DC converters. The products are designed using a high-efficiency synchronous rectification topology. They feature two independent fully regulated outputs, which are individually trimmable. The EXB30 Dual employs Dynamic Current Allocation such that maximum current can be drawn from either output with a total output current capability of 6A. No minimum load is required for either output. In addition, these products incorporate a tracking feature such that both outputs rise together with their output differential never exceeding 0.7 Volts during start-up. A remote on/off and latching overvoltage protection for both outputs are included as standard. These latches are enabled by default, but can be disabled by the user.

Notes

- 1 Latching OVP response time is 1ms (typical). OVP latch is reset by toggling remote ON/OFF or by recycling the input voltage.
- 2 Figures are percentage of minimum input voltage.
- 3 $R_{short} \leq 20m\Omega$.
- 4 User must provide recommended fuses in order to comply with safety approvals.
- 5 Maximum continuous output power.
30 Watts for D05-3V3 models
20 Watts for D3V3-2V5 models.
- 6 Maximum temperature on hot spots not to exceed 120°C. See Application Note 109 on our website for details.

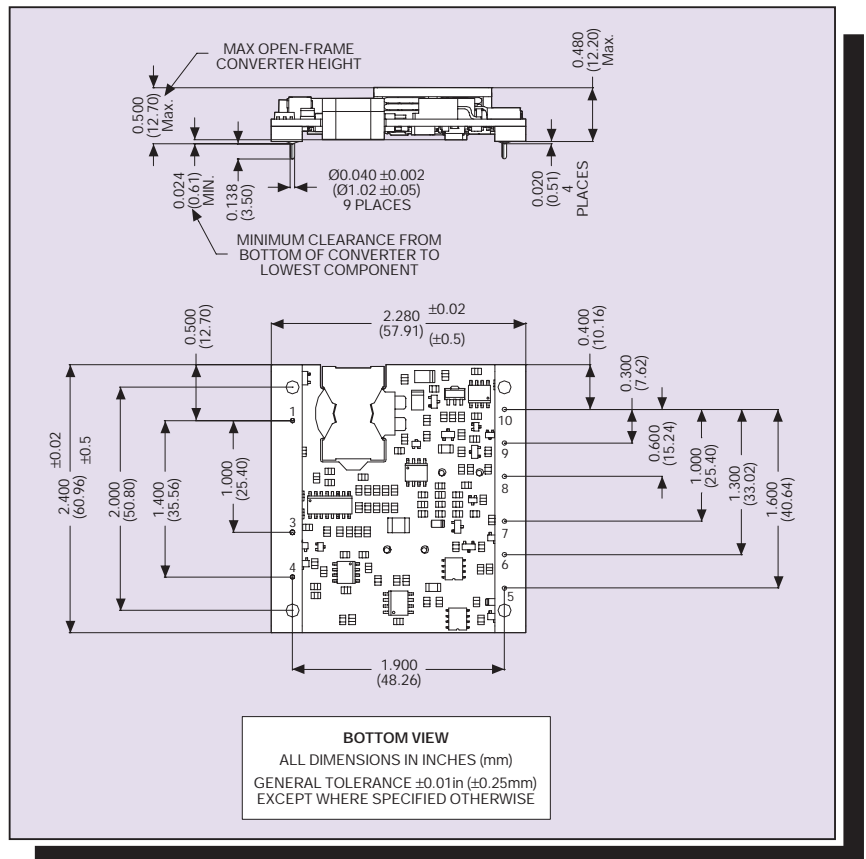

CAUTION: Hazardous internal voltages and high temperatures.
Ensure that unit is not user accessible.
