

# ACPM-9420-TR2

## LTE Band 20 MIPI ET PA

### 2.0 mm × 2.5 mm

## Power Amplifier Module

### Product Brief

#### Description

The ACPM-9420 is a fully matched 10-pin surface mount power amplifier module developed for LTE Band 20. The 2 mm × 2.5 mm form-factor package is self contained, and it incorporates 50-ohm input and output matching networks.

The ACPM-9420 features CoolPAM circuit technology that supports two power modes—low and high. The CoolPAM is a stage bypass technology that enhances PAE (power added efficiency) at low power range.

The power amplifier is manufactured on an advanced InGaP HBT (hetero-junction bipolar transistor) MMIC (microwave monolithic integrated circuit) technology that offers state-of-the-art reliability, temperature stability, and ruggedness.

#### Features

- Thin package (0.93 mm typical)
- Excellent linearity in envelope tracking mode
- MIPI RFFE interface
- Two-mode power
- Quiescent current control for high power mode and low power mode
- Ten-pin surface mounting package
- Internal 50-ohm matching networks for both RF input and output
- Separate drive and output VCC supplies
- Low bypass capacitance
- Green – Lead-free and RoHS compliant

#### Applications

- Band 20 LTE

#### Ordering Information

Part Number	Number of Devices	Container
ACPM-9420-TR2	1,000	178 mm (7 in.) tape/reel

## Package Dimensions

The dimensions are in millimeters.

## Marking Specification

D – Date Code  
ZZ – Assembly Lot Identification  
9420 – Device Code

## Pin Description

Pin #	Name	Description
1	VCC1	DC supply voltage, connect to the RF stages' collector to which APT/ET is applied (0.5V~3.5V)
2	RFIN	RF input
3	Vbat	DC supply voltage, connect to the bias circuitry with a fixed voltage (higher than 3.0V)
4	Vio	RFFE enable
5	Sdta	RFFE data
6	Sclk	RFFE clock
7	GND	Ground
8	NC	No connection
9	RFOUT	RF output
10	VCC2	DC supply voltage, connect to the RF stages' collector to which APT/ET is applied (0.5V~3.5V)
