Notes:

1. The above kit numbers represent the order codes which include multiple intensity-bin and color-bin codes. Only one intensity-bin code and one color-bin code will be shipped on each reel. Single intensity-bin code and single colorbin code will be orderable in certain quantities.
2. For example, any 1 intensity-bin from $K-P$ means only 1 intensity-bin ( $K$ or np or $M$ or qr or $N$ or st or $P$ ) will be shipped by Cree.
3. For example, any 1 color-bin from G 7 - Ga means only 1 color-bin ( G 7 or G 23 or G 8 or G 45 or G 9 or G 67 or Ga ) will be shipped by Cree.
4. Please refer to the "Cree LED Lamp Reliability Test Standards" document for reliability test conditions.

The levels of environmentally sensitive, persistent biologically toxic (PBT), persistent organic pollutants (POP), or otherwise restricted materials in this product are below the maximum concentration values (also referred to as the threshold limits) permitted for such substances, or are used in an exempted application, in accordance with EU Directive 2002/95/ EC on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS), as amended through April 21, 2006.

## Vision Advisory Claim

Users should be cautioned not to stare at the light of this LED product. The bright light can damage the eye.

## KIT NUMBER SYSTEM

Cree LED lamps are tested and sorted into performance bins. A bin is specified by ranges of color, forward voltage, and brightness. Sorted LEDs are packaged for shipping in various convenient options. Please refer to the "Cree LED Lamp Packaging Standard" document for more information about shipping and packaging options.

Cree LEDs are sold by order codes in combinations of bins called kits. Order codes are configured in the following manner:
