

## **High Current Adapter for NI myRIO**

Part # 6002-410-012

Hide Details

MXP Connector compatible with NI myRio

- Uses the myRIO Expansion Port (MXP) connector

  Supports 3V 16V output voltage (external power supply required)

  4 Open drain outputs

  Continuous current 3.0A (25°C) / 2.2A (85°C)

- Peak output current: 4.1A (t<5s)
- 4 Standard 3 terminal relay outputs
  Common, Normally Closed, Normally Open
- Relay output max switching voltage: 30V
  Rated Current: 1A
- 34-pin female breakout allowing direct user access to signal pins

With the High Current Adapter, you can use your NI myRIO to interact with high current applications such as driving LED Strips, relays, and servos. (For motor applications, please see the <u>myRIO Motor Adapter Board</u>.)

The High Current Adapter is able to run applications from 3V-16V and can deliver current up to 4A, providing users with a way to plug their applications in directly without any additional electronics required.
