

**PowerStor**<sup>®</sup> Design Kits

Cooper Electronic Technologies has developed a series of PowerStor design kits for engineers to experiment with and use to determine the right supercapacitor for their applications.

## PS-5903: High Power Design Kit for Pulse and Bridge Power Applications

 The PS-5903 kit includes all of PowerStor's 2.5V A Series supercapacitors from 0.47 to 4.7F and the 5.0V PA Series supercapacitors from 0.22 to 0.47F.

### PS-5904: High Energy Design Kit for Bridge Power and Memory Backup Applications

 The PS-5904 kit includes the lower value 2.5V B Series supercapacitors from 0.22 to 3.3F and the 5.0V PB Series supercapacitors from 0.1 to 1.0F.

### PS-5905: High Energy Design Kit for Bridge, Pulse and Main Power Applications

• The PS-5905 kit includes the mid range 2.5V B Series supercapacitors from 3.3 to 10F.

# PS-5906: High Energy Design Kit for Main, Bridge and Pulse Power Applications

 The PS-5905 kit includes the higher value 2.5V B Series supercapacitors from 22 to 50F.

PowerStor's Design Kits are available from any of our distributors. For a list of distributors please visit www.cooperet.com/distributors.asp.
