

Switching Spark Gap

SSG with lead wires

Series/Type: FS03X-1GS Ordering code: B88069X600

Ordering code: B88069X6000T502

Version/Date: Issue 03 / 2006-01-12

Switching Spark Gap B88069X6000T502

SSG with lead wires FS03X-1GS

Bosch ID-No. 1 237 320 004

| Features | Applications |
|---|---------------------|
| Extremely long life time | Ignition circuits |
| Stable performance over life | High voltage switch |
| Insensitive performance against variations in temperature | |
| Very low switching losses | |
| Very short breakdown time | |
| High reliability by robust design | |
| RoHS compatible | |

Electrical specifications

| Nominal breakdown voltage V _N | 400 | V |
|--|---|--|
| Initial values ²⁾ Static breakdown voltage V _S ¹⁾ First ignition value V _{S, FTE} after 24 hours in darkness Following ignition values V _{S, FIV} | ≤ 440 360 430 | V |
| Electrical life time $^{3)}$ Breakdown voltage V_B First ignition value $V_{B,FTE}$ after 24 hours in darkness Ignition time t_I at V_0 during life Following ignition values $V_{B,FIV}$ | ≤ 450 ≤ 200 360 440 | V ms V |
| Switching operations in total at – 40 °C at + 25 °C at + 125°C | 100 000 10 000 40 000 50 000 | Ignitions Ignitions Ignitions Ignitions |
| Test circuit parameters Open circuit voltage V ₀ Loading resistance R Discharge capacitance C Inductance L Discharge peak current I _P , 8 half cycles, 850 V | 449 450 61 75 423517 1.5 2.5 max. 250 | V kΩ nF μH A |
| General technical data Insulation resistance at 100 V Early ignition values below 722 V Breakdown time Maximum switching frequency Maximum loading current Weight | > 10 ≤ 1 ≤ 50 100 40 ~ 2 | MΩ % ns Hz mA g |
| Marking, blue positive additional blue dot on ceramic | EPCOS 400 WWY O 400 - Nominal voltage WW - Calendar week of production Y - Year of production O - Non radioactive | |

Dimensional Drawing

Not to scale

Dimensions in mm

Non controlled document

Basic material of wires: Cu-OF

Surface of wires:

- 1) silver-plated (6 ±3)µm
- 2) tin-plated (25 ±20) μm

Cautions and warnings

- Switching spark gaps may be used only within their specified values.
- Damaged switching spark gaps must not be re-used.

Important notes

The following applies to all products named in this publication:

- 1. Some parts of this publication contain statements about the suitability of our products for certain areas of application. These statements are based on our knowledge of typical requirements that are often placed on our products in the areas of application concerned. We nevertheless expressly point out that such statements cannot be regarded as binding statements about the suitability of our products for a particular customer application. As a rule, EPCOS is either unfamiliar with individual customer applications or less familiar with them than the customers themselves. For these reasons, it is always ultimately incumbent on the customer to check and decide whether an EPCOS product with the properties described in the product specification is suitable for use in a particular customer application.
- 2. We also point out that in individual cases, a malfunction of passive electronic components or failure before the end of their usual service life cannot be completely ruled out in the current state of the art, even if they are operated as specified. In customer applications requiring a very high level of operational safety and especially in customer applications in which the malfunction or failure of a passive electronic component could endanger human life or health (e.g. in accident prevention or life-saving systems), it must therefore be ensured by means of suitable design of the customer application or other action taken by the customer (e.g. installation of protective circuitry or redundancy) that no injury or damage is sustained by third parties in the event of malfunction or failure of a passive electronic component.
- 3. The warnings, cautions and product-specific notes must be observed.
- 4. In order to satisfy certain technical requirements, some of the products described in this publication may contain substances subject to restrictions in certain jurisdictions (e.g. because they are classed as "hazardous"). Useful information on this will be found in our Material Data Sheets on the Internet (www.epcos.com/material). Should you have any more detailed questions, please contact our sales offices.
- 5. We constantly strive to improve our products. Consequently, **the products described in this publication may change from time to time**. The same is true of the corresponding product specifications. Please check therefore to what extent product descriptions and specifications contained in this publication are still applicable before or when you place an order.
 - We also **reserve the right to discontinue production and delivery of products**. Consequently, we cannot guarantee that all products named in this publication will always be available.
- 6. Unless otherwise agreed in individual contracts, all orders are subject to the current version of the "General Terms of Delivery for Products and Services in the Electrical Industry" published by the German Electrical and Electronics Industry Association (ZVEI).
- 7. The trade names EPCOS, CeraDiode, CSSP, PhaseCap, PhaseMod, SIFI, SIKOREL, SilverCap, SIMID, SIOV, SIP5D, SIP5K, TOPcap, UltraCap, WindCap are **trademarks registered or pending** in Europe and in other countries. Further information will be found on the Internet at www.epcos.com/trademarks.
