ethertronics

PRODUCT: 802.11 2.4GHz/5GHz

Part No. 1001932PT

Prestta[™] WLAN BT Zigbee Tunable Embedded PCB Antenna 802.11 2.4GHz/5GHz

Ethertronics' Prestta series of Isolated Magnetic Dipole™ (IMD) trace antennas address the challenges facing today's product designers. IMD's high performance and isolation characteristics offer better connectivity and minimal interference.

IMD antennas can be used in a variety of devices:

- Computing Devices
- Networking Devices
- M2M, IoT wireless devices

TECHNOLOGY ADVANTAGES

Stays in Tune

IMD antenna technology provides superior RF field containment, resulting in less interaction with surrounding components. Ethertronics IMD antennas **resist de-tuning**; providing a robust radio link regardless of the usage position.

Prestta WLAN antennas use patented IMD technology in a trace configuration to provide high performance. IMD antennas requires a smaller design keep-out area, carry lower program development risk which yields a quicker time-to-market, without sacrificing RF performance.

This antenna enables limited range RF tuning by solder bridges or cuts to be more adaptive for the antenna install environment.

KEY BENEFITS

DESIGN ADVANTAGES

Quicker Time-to-Market

• By optimizing antenna size, performance and emissions, customer and regulatory specifications are more easily met.

Greater Flexibility

- Ethertronics' first-in-class IMD technology enables you to develop concept designs that are more advanced and that deliver superior performance in reception-critical applications.
- Multiple cable lengths to fit a variety of devices.

RoHS Compliant

• Ethertronics' antennas are fully compliant with the European RoHS Directive 2011/65/EU.

END USER ADVANTAGES

Unique Form Factors Support Advanced Industrial Designs

 Smaller, more efficient IMD embedded antennas break through restrictive design rules and provide new freedom in component placement.

Superior Range & Signal Strength

• Better antenna function means longer range and greater sensitivity to critically precise signals—delivering greater customer satisfaction while building brand loyalty.

SERVICE AND SUPPORT

Extensive RF Experience

• Ethertronics antennas are supported by documentation, and when needed, by the expertise of RF engineers who have integrated hundreds of antenna designs into wireless devices.

Global Operations & Design Support

• Ethertronics' global operations supports an integrated network of design centers that can take projects from concept to production.

Antenna Tuning

This antenna has unique features enabling limited range RF tuning by leaving P1-P6, C1-C2 solder bridge or cut. Refer to detailed tuning options.

Tuning Options

Options for Tuning: "2.4GHz (Lower)"

| MODE | <u>T1</u> | <u>T2</u> | <u>T3</u> | <u>T4</u> |
|-----------------------------|----------------------|----------------------|----------------------|----------------------|
| PADS | Connect: P2 | Connect: P1 | Connect: (P2+P3) | Connect: (P1+P3) |
| Outcome: (Ref: Baseline) | ∼200MHz shift low | ∼250MHz shift low | ~350MHz shift low | ~370MHz shift low |

Options for Tuning: "2.4GHz (Higher)"

| MODE | <u>C1</u> | <u>C2</u> | |
|-----------------------------|-----------------------|-----------------------|--|
| PADS | Cut: C1 | Cut: C2 | |
| Outcome: (Ref: Baseline) | ~170MHz shift high | ~300MHz shift high | |

Options for Tuning: "5GHz (Lower)"

| MODE | <u>T5</u> | <u>T6</u> | <u>T7</u> | <u>T8</u> |
|-----------------------------|----------------------|-----------------------|----------------------|-----------------------|
| PADS | Connect: P4 | Connect: (P4+P5) | Connect: P6 | Connect: (P5+P6) |
| Outcome: (Ref: Baseline) | ~200MHz shift low | ~1500MHz shift low | ~500MHz shift low | ~1900MHz shift low |
