- 4.10 Material composition for lamp module housing 20% glass filled nylon (UL94VO). Maximum recommended temperature is 100°C.
- 4.11 Optical components used with lamp module should not impede air flow, nor should they reflect radiated energy back towards the lamp.
- 4.12 Air flow and air inlet temperature should always ensure lamp temperature is kept within specification throughout lamp life.
- 4.13 EMI characteristics may vary with operating hours and power. Adequate system precautions should be taken.
- 4.14 Additional EMI may result when operated outside the recommended power range.
- 4.15 Non-operating Shock and Vibration per ISTA1A.
