The JLINK-ARM-AD is designed to work with FDI's products that utilize a mini-JTAG connector. Products include the following:

- uEZGUI-xxx-43WQS
- uEZGUI-xxx-70WVE
- SOMDIMM-LPCxxxxx

This product is intended for users who currently own a standard 20-pin JTAG debugger that is compatible with ARM based processor like the SEGGER J-Link, no debugger is included with this product. FDI products with a JTAG interface use a reduced size JTAG connector based on a 2mm header. This smaller connector provides 100% of the functionality of the standard 20-pin JTAG connector, but utilizes 70% less board space.
