

Helaglass

Features & Benefits:

G6SE is a glass fibre braid lightly impregnated with silicone.

Electrical:

- Dielectric strength : 0.8kV

Physical-chemical:

- Good resistance to chemical atmospheres
- Good flexibility
- Fireproof

Application:

GSS is used for the insulation of wires in heating elements and other domestic appliances subject to high temperatures.

This flexible glass-fibre braided sleeving is impregnated with silicone and is especially suited for thermal protection in lighting applications.

Material Data:

Material: Glass fibre with silicone

Colour: White (WE)

Operating Temp: -60°C to +250°C Continuous, (peaks of +450°C)

Flammability: Self-extinguishing

Mftrs List No.	Dia (mm)	Length (L) Metres	Colour
