

1 mm Pitch Double Rows Low Profile Board-to-Cable Connectors

DF20 series

■ Features

1. Contact Pitch

1 mm contact pitch allows reliable solder and cable termination.

2. Low profile

Total mating height above the board is 5.8 mm for the straight type and 5.5 mm for the right angle type.

3. Reliable electrical connection wipe

Effective electrical connection is assured with a 1mm wipe of mating contacts.

4. Narrower external width and length

Redesigned metal fittings decreased the overall length of the board-mount receptacle and permit end-to-end mounting of several connectors.

5. Automatic equipment board placement

Straight type pin headers are supplied with a 5.4 mm X 4.6mm flat platform to allow vacuum pick-up and placement on the board.

6. Product variations

- (1) Available with 10, 20, 30, 40, and 50 contacts.
- (2) Pin headers are available in two types: with or without board positioning bosses.
- (3) Depending on specific application pin headers can be ordered in straight or right angle types.

◆ Usage recommendation

<p>1. Recommended Soldering</p> <p>Temperature Profile for IR Reflow.</p>	 <p>The graph shows a temperature profile for IR reflow soldering. The y-axis represents Temperature in °C, ranging from 0 to 250. The x-axis represents Time in seconds, ranging from 0 to 200. The profile starts at 0°C, rises to 150°C by 30 seconds, and remains at 150°C for 120 seconds (labeled 'Preheating'). It then rises to a peak of 240°C and remains at that temperature for 10 seconds (labeled 'Soldering'). Finally, it cools down to 220°C. A box titled 'IR Reflow' contains the following text: 'Preheating: 150°C for 60 sec. to 120 sec. Soldering: 235°C±5°C for 10 sec. max. ... Maximum 240°C 220°C min. 10s to 30s ... 220°C'. Dashed horizontal lines indicate the 240°C and 220°C levels.</p> <p>Note 1: Up to 2 cycles of reflow soldering are possible under the same conditions, provided that there is a return to normal temperature between the first and second cycle.</p> <p>Note 2: The temperature indicates the board surface temperature at the points of contacts with the connector terminals.</p>
<p>2. Recommended Manual Soldering Conditions</p>	<p>Soldering temperature: 290°C ±10°C, Soldering time: within 3 sec.</p>
<p>3. Recommended Solder Screen Thickness</p>	<p>0.15mm</p>
<p>4. Board Warping</p>	<p>Maximum of 0.03 mm at the connector center section, with both ends of the connector as reference points.</p>
<p>5. Cleaning Conditions</p>	<p>Refer to "Nylon Connector Use Handbook."</p>
<p>6. Wiring Termination Conditions</p>	<p>Refer to "Nylon Connector Use Handbook." Crimp contacts should be handled with care as not to cause any deformation or damage affecting the performance or termination.</p>
<p>7. Mating / un-mating precautions</p>	<p>Excessive twisting and pulling on wires during mating/un-mating should be avoided as it may cause damage to connectors.</p>
