

ZERO DELAY LOW SKEW BUFFER AND MULTIPLIER

ICS671-01

Description

The ICS671-01 is a low phase noise, high speed PLL based, 8 output, low skew zero delay buffer and multiplier. Based on IDT's proprietary low jitter Phase Locked Loop (PLL) techniques, the device provides eight low skew outputs at speeds up to 160 MHz at 3.3V. The part includes a bank of six outputs running at either x2 or x4 mode, one output running at either x2, x4, or x4 mode, and one additional output running at either x1, x2, or x4 mode. For normal operation as a zero delay buffer, any output clock is tied to the FBIN pin.

IDT manufactures the largest variety of clock generators and buffers and is the largest clock supplier in the world.

Output Clock Mode Select Table

S1	S0	CLK1:6	CLK7	CLK8	Input Range
0	0	Tri-state (note 1)	Tri-state (note 1)	Tri-state (note 1)	-
0	1	x2 (note 2)	x5 (note 2)	x1	5 to 30 MHz
1	0	x2	x2	x2	15 to 80 MHz
1	1	x4	x4	x4	7.5 to 40 MHz

Note 1. Outputs are in high impedance state

Note 2: In S1:S0 = 01 Mode, only the x1 output on CLK 8 will be zero delay. The x2 and x5 outputs can power-up in different states so the skew relationship is not defined.

External Components

The ICS671-01 requires a minimum number of external components for proper operation. Decoupling capacitors of 0.01mF should be connected between VDD and GND on pins 4 and 5, and VDD and GND on pins 13 and 12, as close to the device as possible. A series termination resistor of 33Ω may be used to each clock output pin to reduce reflections.

Absolute Maximum Ratings

Stresses above the ratings listed below can cause permanent damage to the ICS671-01. These ratings, which are standard values for IDT commercially rated parts, are stress ratings only. Functional operation of the device at these or any other conditions above those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rating conditions for extended periods can affect product reliability. Electrical parameters are guaranteed only over the recommended operating temperature range.
