

This specification applies to the electret condenser microphone outlined within this document.

Model Number:

mber: MB6022USC-3

I. Electrical Characteristics Test Condition (Vs= 2.0 V, RL= 2.2 k ohm, Ta=20°C, RH=65%)

| ITEM                            | SYMBOL                                 | TEST CONDITION   | MINIMUM           | STANDARD      | MAXIMUM | UNITS           |
|---------------------------------|--|--|-------------------|---------------|---------|-----------------|

Issued Date: 2004/6/16 Version: A

| III. Reliability Tests | <b>Note:</b> After any of the following tests performed, the sensitivity of the microphone unit shall not deviate more than ±3dB from its initial value. The microphone shall maintain its initial operation and appearance. Measurements for tests with thermal requirements are to be done after 2hrs of condistioning at 20°C. |  |
|------------------------|---|--|
| Vibration Test         | The microphone to have no interferance in operation after vibrations, 10Hz to 55Hz for 1 minute full amplitude 1.52mm, for 2 hours at three axises.   |  |
| Drop Test              | The microphone unit must operate when dropped three times once on each axis from a height of 1m onto a metal plate.   |  |
| Temperature Test       | HighThe microphone unit must operate within its sensitivity specifications after<br>subjected to the following conditions: +80°C for 72 hrs, and exposed to room<br>temperature for 2 hrs.  |  |
|                        | Low The microphone unit must operate within its sensitivity specifications after<br>subjected to the following conditions: -40°C for 72 hrs, and exposed to room<br>temperature for 2 hrs.  |  |
| Humidity Test          | +40°C at 95%RH for 240 hrs  |  |

| After exposure at -20°C for 60 minutes, at+25°C for 60 minutes, at +70°C for 60 minutes, at +25°C for 60 minutes, 10 cycles. (The measurement to be done after 6 hrs of conditioning at +20°C.) |
|---|
