

PRODUCT SPECIFICATION

Doc: MB6027USC-3

This specification applies to the electret condenser microphone outlined within this document.

Model Number: MB6027USC-3

I. Electrical Characteristics Test Condition (Vs= 2.0 V, RL= 2.2 k ohm, Ta=20°C, RH=65%)

III. Reliability Tests

Note: After any of the following tests performed, the sensitivity of the microphone unit shall not deviate more than ±3dB from its initial value. The microphone shall maintain its initial operation and appearance. Measurements for tests with thermal requirements are to be done after 2hrs of condistioning at 20°C.

Vibration Test	The microphone to have no interferance in operation after vibrations, 10Hz to 55Hz for 1 minute full amplitude 1.52mm, for 2 hours at three axises.		
Drop Test	The microphone unit must operate when dropped three times once on each axis from a height of 1m onto a metal plate.		
Temperature Test	High The microphone unit must operate within its sensitivity specifications after subjected to the following conditions: +80°C for 72 hrs, and exposed to room temperature for 2 hrs.		
	Low The microphone unit must operate within its sensitivity specifications after subjected to the following conditions: -40°C for 72 hrs, and exposed to room temperature for 2 hrs.		
Humidity Test	+40°C at 95%RH for 240 hrs		
Temperature Cycle Test	After exposure at -20°C for 60 minutes, at+25°C for 60 minutes, at +70°C for 60 minutes, at +25°C for 60 minutes, 10 cycles. (The measurement to be done after 6 hrs of conditioning at +20°C.)
