

Phantom Elite® 800 MHz-5.8 GHz Antennas

PHANTOM ELITE® ANTENNA IS IDEAL FOR CELL, GSM, PCE, WIFI, 802.11 AND BLUETOOTH WIRELESS APPLICATIONS

Laird's unique patented Phantom Elite® is a tough low-profile antenna for outdoor or indoor applications. Measuring only 2.7" tall, the Phantom Elite 800 MHz to 5.8 GHz antenna models' revolutionary design features field diversity with both vertical and horizontal polarization components. This gives the antenna diversity, frequency agility, low visibility, wide bandwidth and a low angle radiation pattern that is superior to traditional gain antennas in most applications.

The industry standard NMO mounting socket mates with all Laird Technologies' magnetic, trunk lid, and hole mounts. A threaded permanent stud mount model is also available for vandal resistant mounting on brackets, panels, ceilings or any other kind of housing.

The Phantom Elite® patented technology is beneficial when high performance is desired and extreme ruggedness and low profile is required.
