

Pacific Wireless
2007 Product Catalog

Client Side Antennas

Pacific Wireless offers client antennas for 900MHz, 2.4, 3.5 and 5GHz applications. Antennas are compatible with 802.11a/b/g, WiMax, ETSI and various other international standards.

900—928MHz

Part #	Type	Gain (dBi)	BW (deg)	Front to Back	Polarity	Weight (lbs)	Dimensions (in.)
R2T9-12	RooTenna®	12	45	>21dB	Hor / Ver	9	16.5 x 15 x 1

Base Station Antennas

Base station antennas are designed for connection to a wireless access point to serve a large area with wireless access.

Omnidirectional Antennas

Omnidirectional antennas communicate in 360 degrees while the sector antennas cover slices of 90 degrees, 120 degrees or 180 degrees. Generally Omni's are used in less densely populated areas and sectors are used in more heavily populated areas.

Tech Note: Horizontally Polarized (HPOL) antennas are useful in areas where there is a lot of interference. The HPOL technology offers very good interference rejection of VPOL signals.

Point-to-Point Backhaul Antennas

The Pacific Wireless Point-to-Point Backhaul antennas are specifically designed for high performance long distance applications. Backhaul antennas are offered in the 900MHz, 2.4, 3.5 and 5GHz frequencies.

The grid dish backhaul systems are lightweight and offer excellent windloading performance.

The solid parabolic dishes are constructed to withstand the harshest of environments. An optional radome cover is available.

3.5GHz Solid Parabolic Dish

Part No: DA35-25, DA35-28

900MHz Parabolic Grid Dish

Part No: GD9-18

5GHz Solid Parabolic Dish

Part No: HDDA5W

About Pacific Wireless

Pacific Wireless— a unit of Laird Technologies designs and manufactures state of the art wireless communications solutions targeted at the 900 MHz to 5.8 GHz markets for both fixed and mobile applications.

In addition to our line of standard products, we also specialize in custom antenna products for OEM customers.

We ship antennas internationally from single unit quantities up to container quantities.

New products are always in development!

Watch www.pacwireless.com for updates to our product line.
