Item # S1713BNF, Special Purpose Omnidirectional Antennas**Omnidirectional Antennas for PCS/DCS and Wireless LAN**[larger image](#)

Laird Technologies is world renowned for its special purpose omnidirectional antenna designs. Antennas are available for frequencies from the 1.7 GHz DCS band through the 5.8 GHz ISM band and can either be suspension ceiling mounted, I-beam mounted or mast mounted.

2.4 GHz Monopole Omni

The Laird Technologies 2.4 GHz monopole antenna has a large backplane and is designed for applications with a very focused omnidirectional pattern where an in-building system is required. For

example, the monopole could be used to focus signal directly into an area where it is very difficult to get any coverage.
