

Today's work and lifestyles require us to communicate anytime, anywhere whether on the move or sitting still. Bluetooth® and 802.11 standards make wireless connections to computer networks and other devices possible, while at the same time enabling freedom of movement.

Laird Technologies' practical and rugged external wireless device antennas are designed to fit into the portable devices used in office, industrial, and home environments. The antennas feature flexible elements and many are ½ wave coaxial dipole design for reduced ground dependence and improved performance.

### FEATURES

- 1/2 wave coaxial dipole
- Flexible element
- Clutch allows 360° rotation
