

LM072 Bluetooth 2.0 / 2.1 + EDR Serial Data Module

Class 1 BC04, 8MB Flash, Up to 100m

Product LM072
Part No 072-0110
Revised 03/MAR/2015

Features

- Bluetooth standard v2.0 and BT v2.1 + EDR specification
- SPP firmware supported by default.
- CSR Bluecore BC04 chipset
- 802.11 Coexistence supported
- RoHS compliant
- External Antenna
- Extensive Technical Support available
- Support for encryption data and authentication
- Low Cost Solution
- Low Power, Robust Design
- AT Command Set provided for module configuration
- Small outline: 28.2mm x 15mm x 2.8mm
- Class 1 radio - Output power +18 dBm
- 100m range in open space

Applications

- Serial Communications
- Medical Devices
- Domestic and Industrial Applications
- Embedded Devices
- Remote Monitoring and Control
- GPS, POS, Barcode Readers
- Payment Terminals

Overview

LM072 is LM Technologies Ltd Class 1 Bluetooth Data module with external antenna. This module is a CSR Bluecore 4 (BC04) chip based surface mount module available with Bluetooth Serial Port Profile (SPP) firmware.

This module is ideal for adding long range wireless connectivity to embedded products. The module acts as a standalone unit (i.e. it does not need a host to drive it) and can interface with embedded microcontrollers via UART.

It operates over a voltage range of 3.0 V to 3.6 V and gives excellent performance over a distance of 70-100 m with external antenna. This is a tried and tested module also used in other LM best selling products like LM048 and LM058 serial adapter as well as LM400 and LM410 Data Modules.

General Specification

Chipset	CSR Bluecore 4 BC04
Power Classification	Class 1
Module Type	Surface Mount SMT
Bluetooth Specification	Bluetooth 2.0 and Bluetooth 2.1 + EDR
Frequency	2402 - 2480 MHz
Data Rate	Up to 3 Mbps in HCI Mode
Range	Up to 100m in open space
Rx Sensitivity	-82 dBm typical
Antenna	External Antenna
Voltage operation	3.0V - 3.6V
Average Current Consumption (Receiving Data)	114 mA
Power Output	+18 dBm
Default Firmware	v4.55 (BT2.0), v6.18 (BT2.1)
Size	28.2mm x 15mm x 2.8mm
Bluetooth Profile	Serial Port Profile (SPP)
Interface	UART
Serial Parameters	Default 19200, 8 N 1
UART lines	TxD, RxD, GND, CTS, RTS
Baud Rates	1.2/2.4/4.8/9.6/19.2/38.4/57.6/115.2/230.4/460.8/921.6 kbps
Configuration	AT Command Set
Flash Memory	8MB
RoHS Compliant	Yes
Certifications	CE, FCC, BQB

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2

Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance.

Note 1

This module certified that complies with RF exposure requirement under portable or mobile or fixed condition, this module is to be installed only in portable or mobile or fixed applications.

A portable device is defined as a transmitting device designed to be used so that the radiating structure(s) of the device is/are within 20 centimeters of the body of the user

A mobile device is defined as a transmitting device designed to be used in other than fixed locations and to generally be used in such a way that a separation distance of at least 20 centimeters is normally maintained between the transmitter's radiating structure(s) and the body of the user or nearby persons. Transmitting devices designed to be used by consumers or workers that can be easily re-located, such as wireless devices associated with a personal computer, are considered to be mobile devices if they meet the 20 centimeter separation requirement.

A fixed device is defined as a device is physically secured at one location and is not able to be easily moved to another location.

Note 2

Any modifications made to the module will void the Grant of Certification, this module is limited to OEM installation only and must not be sold to end-users, end-user has no manual instructions to remove or install the device, only software or operating procedure shall be placed in the end-user operating manual of final products.

Note 3

The device must not transmit simultaneously with any other antenna or transmitter.

FCC Radiation Exposure Statement (Continued)

Note 4

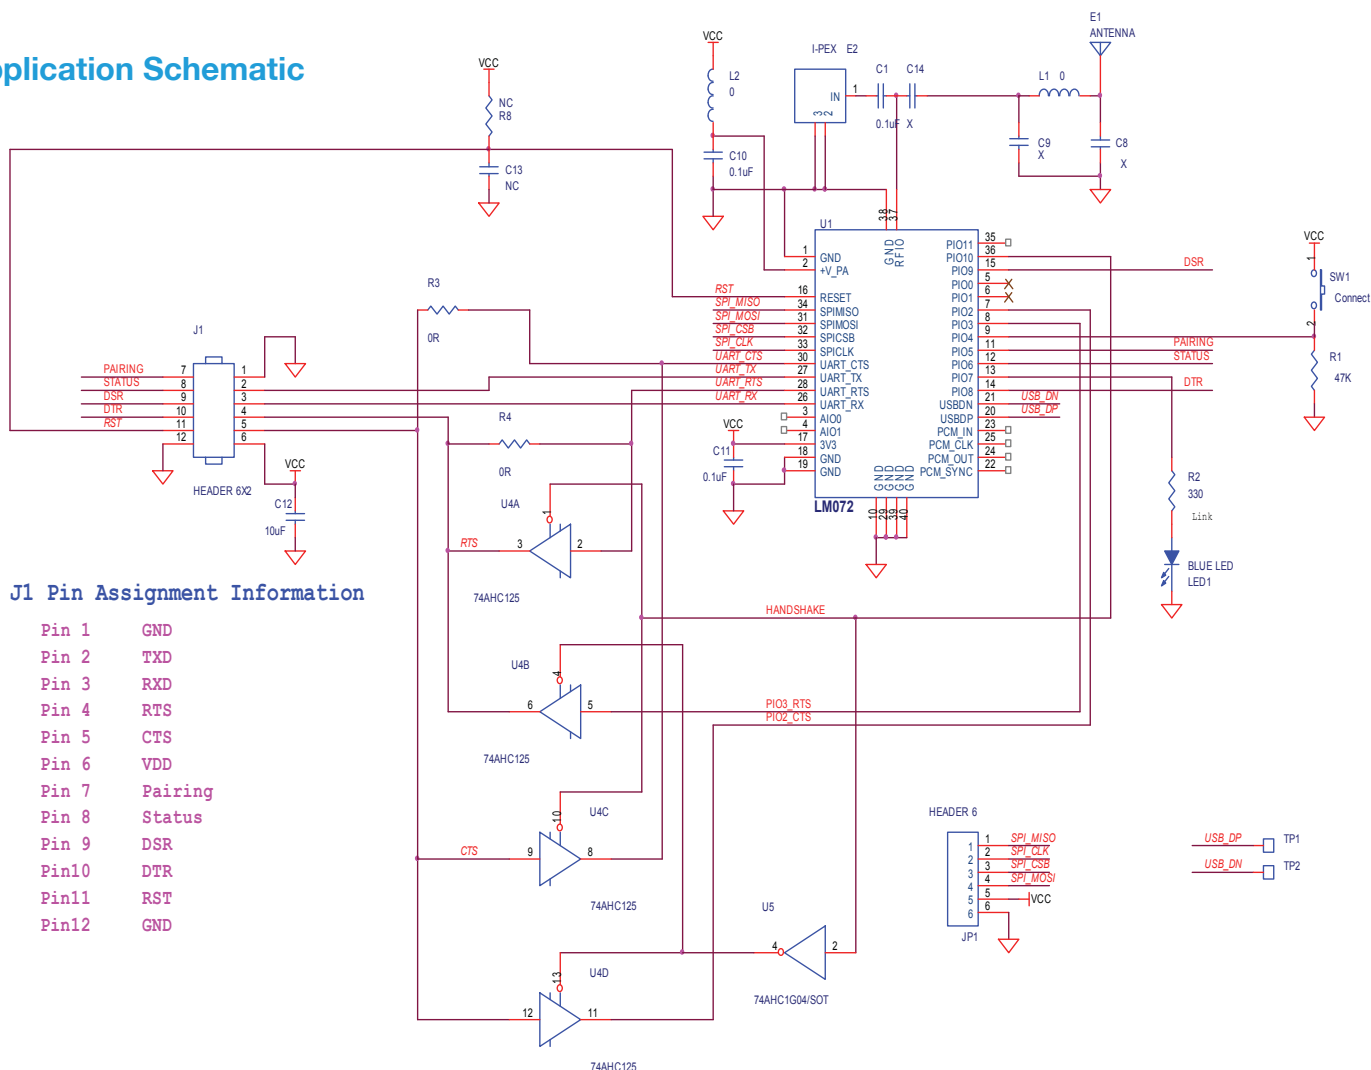

To ensure compliance with all non-transmitter functions the host manufacturer is responsible for ensuring compliance with the module(s) installed and fully operational. For example, if a host was previously authorized as an unintentional radiator under the Declaration of Conformity procedure without a transmitter certified module and a module is added, the host manufacturer is responsible for ensuring that the after the module is installed and operational the host continues to be compliant with the Part 15B unintentional radiator requirements. Since this may depend on the details of how the module is integrated with the host, LM Technologies Ltd shall provide guidance to the host manufacturer for compliance with the Part 15B requirements.

Note 5

FCC ID label on the final system must be labeled with "Contains FCC ID: VVXLM072" or "Contains transmitter module FCC ID: VVXLM072".

The transmitter module must be installed and used in strict accordance with the manufacturer's instructions as described in the user documentation that comes with the host product. LM Technologies Ltd is responsible for the compliance of the module in all final hosts.
