### Description and Applications

M/A-COM's MA4E2072 is a high performance silicon Schottky cross over quad. These parts are usable for a variety of mixer applications. The closely matched junctions minimize variation in capacitance, forward voltage and dynamic resistance within the four diodes in the quad. They are offered in low, medium and high barrier heights. These diodes are available in a small profile surface mount package SOT-143 (ODS-1068). They are available in tape and reel for automatic pick and place assembly.
