Description

M/A-COM's MAAVSS0005 is a GaAs MMIC voltage variable absorptive attenuator in a lead-free SOT-143 4-lead surface mount plastic package. The MAAVSS0005 is ideally suited for use where attenuation fine tuning, fast switching and very low power consumption are required.

Typical applications include radio, cellular, GPS equipment and other automatic gain/level control circuits.

The MAAVSS0005 is fabricated with a monolithic GaAs MMIC using a mature 1 micron process. The process features full chip passivation for increased performance and reliability.
