About PIC32

It's everything you need for developing with Microchip's **high-performance line of 32-bit MCUs based on the MIPS M4K core**. This includes PIC32MX devices, but also the new and **ground-breaking PIC32MZ family (one of fastest microcontrollers on the market with 200 MHz and 330 DMIPS)**.

EasyPIC Fusion also supports PIC24 and dsPIC33 MCUs – giving you some additional options should you decide to branch out in the future.
