

Overview

We would like to provide our customers with extra MCUs for development purposes. At present, we are offering **48-pin EasyPSoC MCU Cards** with different microcontrollers soldered on them. These cards are compatible with our EasyPSoC development system.

48-pin EasyPSoC MCU Cards provide easy connection to the development system through two 22-pin single in-line connectors. The bottom layer of these cards is provided with a ground plane for noise prevention.

CUSTOMIZATION: We can modify our products to suit your requirements, click [here for details](#).
