SEMICONDUCTOR

# 74F521 8-Bit Identity Comparator

### **General Description**

The 74F521 is an expandable 8-bit comparator. It compares two words of up to eight bits each and provides a LOW output when the two words match bit for bit. The expansion input  $\overline{I}_{A=B}$  also serves as an active LOW enable input.

### Features

- Compares two 8-bit words in 6.5 ns typ
- Expandable to any word length
- 20-pin package
