## DCx40 DC/DC Converters

## SPECIFICATIONS:

## Input

DCD models: $24 \mathrm{Vdc}, 18-32 \mathrm{Vdc}$; DCG models: $48 \mathrm{Vdc}, 36-72 \mathrm{Vdc}$. Hold-up Time
6 mSec minimum from loss of dc input at full load, nominal line.

## Output Power

Normal continuous output power is $40 \mathrm{~W}(45 \mathrm{~W}$ Pk) for 60 sec .

## Output Regulation

Regulation for multiple-output models measured by $\pm 40 \%$ load changeFrom $60 \%$ rated load with all other outputs at $60 \%$ full rated load and a line voltage change from low line to high line. Initial set tolerance is measured with all outputs at $60 \%$ of full rated load. Output voltage V1 requires $20 \%$ load for proper regulation of multiple-output models. Regulation for single-output models measured by changing load from $5 \%$ load to $50 \%$ load or $50 \%$ load to full load in either direction.

## Remote Sense

Standard on single-output versions. Capable of compensating for 0.25 V total of cabling losses in the output voltage.

## Overload Protection

Fully protected against short circuit and output overload. Short circuit protection is cycling type power limit on outputs \#1 and \#2; foldback type on output \#3. Factory set to begin power limiting at approximately 55 W .

## No Load Turn-on/Standby

No degradation of reliability will occur; however, regulation may be affected.

## Output Noise and Ripple

$0.5 \%$ RMS, $1.5 \%$ Pk-Pk, 20 MHz bandwidth, differential mode. Measured with scope probe directly across output terminals of the power supply with load terminated with $0.1 \mu \mathrm{f}$ capacitor.

## Transient Response

Main output; $500 \mu s e c$ typical response time for return to within $0.5 \%$ of final value for a $50 \%$ load step within the regulation limits of minimum and maximum load, $\Delta \mathrm{i} / \Delta \mathrm{t}<0.2 / \mu \mathrm{sec}$. Maximum voltage deviation is $3.5 \%$.

## Overvoltage Protection

Built in on V1 with firing point set per output ratings table. OVP firing reduces outputs 1 and 2 to less than $50 \%$ of nominal voltage in 50 msec .

## Voltage Adjustment

Factory set on standard units. However, optional potentiometer adjusts voltage from 4.7 V to OVP point ( 6.2 V nominal) on the +5 V output. Note: output \#1 must not be more than $1 \%$ below nominal to achieve full output voltage range on output \#2. Output regulation limits in some models may be exceeded when the main output is adjusted beyond $+/-1 \%$ of nominal voltage. See output ratings chart for additional notes and conditions. High voltage settings may degrade the reliability of the unit due to excessive

## FEATURES

- 40 W dc/dc converter
- Same size as ac input version
- Drop-in replacement for GLC40 series
- Two input ranges: 24 V and 48 V
- Two-year warrranty
- Full off-line isolation
- Single and multiple output versions available
- C $\in$ marked to LVD
power dissipation in some outputs. Consult factory for application assistance.
Efficiency
68\% minimum at full rated load, nominal input voltage, depending upon model and load distribution. Single-output models $=72 \%$ to $80 \%$ depending upon model.

## Overshoot

Less than 3\% at turn-on under nominal conditions, inversely proportional to input voltage and temperature. Less than $2 \%$ overshoot at turn-off under all conditions.

## Turn-on Time

Less than 1 sec . At nominal line, $25^{\circ} \mathrm{C}$ (inversely proportional to input voltage and thermistor temperature).

## Input Protection

Internal fuse provided on all units. Inadvertent reverse voltage application will blow fuse without risk of fire or shock hazard. Otherwise, internal fuse is designed to protect against catastrophic circuit failures. Fuse does not blow on overload or short circuit.

## Inrush Current

Inrush is limited by internal thermistors to 22 A pk @ 24 Vdc and 44 A pk @ 48 Vdc.

## Temperature Coefficient

$0.03 \% /{ }^{\circ} \mathrm{C}$ typical on all outputs.

## Environmental

Designed for 0 to $50^{\circ} \mathrm{C}$ operation at full rated output power; derate output current and total output power by $2.5 \%$ per ${ }^{\circ} \mathrm{C}$ above $50^{\circ} \mathrm{C}$. See Environmental and Packing Specification on next page.

## Storage

-40 to $+85^{\circ} \mathrm{C}$.
EMI Compliance
All models include built-in EMI filtering to meet or exceed the emissions requirements of FCC Class B. CISPR 22-Class B. Typical margins $>3 \mathrm{~dB}$ at all frequencies and line/load conditions.

## Safety

All DCx models are approved to UL 1950 (with no D4 deviations), CSA22.2 No. 234 Level 3, IEC950, EN60950.

## DCx40 DC/DC Converters

| Model (B) | Output No. | Output | Minimum Load | Current | Total Regulation | OVP | Ripple and Noise | Notes |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| DCx40A | 1 | +5.1 V | 0.4 A | 4 A | 2\% | $6.2 \pm 0.6 \mathrm{~V}$ | 1\% | A |
|  | 2 | +12 V | 0.2 A | 2 A | 6\% |  | 1\% |  |
|  | 3 | -12 V | 0 A | 0.4 A | 5\% |  | 1\% |  |
| DCx40B | 1 | +5.1 V | 0.4 A | 4 A | 2\% | $6.2 \pm 0.6 \mathrm{~V}$ | 1\% | A |
|  | 2 | +15 V | 0.2 A | 2 A | 6\% |  | 1\% |  |
|  | 3 | -15 V | 0 A | 0.4 A | 5\% |  | 1\% |  |
| DCx40D | 1 | +5.1 V | 0.4 A | 4 A | 2\% | $6.2 \pm 0.6 \mathrm{~V}$ | 1\% | A |
|  | 2 | +24 V | 0.1 A | 1 A | 6\% |  | 1\% |  |
|  | 3 | -12 V | 0 A | 0.4 A | 5\% |  | 1\% |  |
| DCx40-5 | 1 |  |  | 7.8 A | 2\% | $6.2 \pm 0.6 \mathrm{~V}$ | 1\% |  |
| DCx40-12 | 1 |  |  | 3.3 A | 2\% | $14 \pm 1.1 \mathrm{~V}$ | 1\% |  |
| DCx40-15 | 1 |  |  | 2.7 A | 2\% | $18.5 \pm 1.5 \mathrm{~V}$ | 1\% |  |
| DCx40-24 | 1 |  |  | 1.7 A | 2\% | $28 \pm 2.5 \mathrm{~V}$ | 1\% |  |
| DCx40-28 | 1 |  |  | 1.4 A | 2\% | $34 \pm 2.8 \mathrm{~V}$ | 1\% |  |

A. To maintain these regulation conditions, the 5.1 V current must be at least $20 \%$ of V 2 and not greater than five times the V 2 current, and requires +5.1 V to be adjusted within $\pm 1 \%$, with at least a 0.4 A load.
B. Replace "x" with " $D$ " for 24 Vdc input or " $G$ " for 48 Vdc input.
