

Low Power Medical Power Supplies 65 Watt AC/DC Universal Input Power Supply

Summary:

- 100 - 240 Vac nominal input range
- Overvoltage and short circuit protection
- Approved to UL, CSA and EN Standards
- Class II input available (G2T60)
- RoHS Compliant Model Available (G suffix)

The GNT60 Series is a 65 W universal input AC/DC power supply in a very small footprint. With the medical approvals the GNT60 is ideal for a variety of medical device applications including small single board computers, battery charging, running small motors, pumps, and solenoids. The series, with approval to 60601-1 and 60950 standards, improves design-in time and reduces end system compliance costs.

NOTES

- All models 65 W with 100 lfm airflow except GNT60-12 (60 W)
- When the input voltage is less than 90 Vac the operating temperature range is 0°C to 40°C. The ripple and regulation specs. may not be met.
- Peak output rating is 70 Watts for 1 minute.
- Noise 0.5% RMS, 1% Pk-Pk, 20 MHz Bandwidth, differential mode. Measured with scope probe directly across output terminals of the power supply.
- Heatsink temperatures should not be allowed to exceed 90 °C
- Installation data is online at www.condorpower.com
- Add "G" suffix to model number for RoHS compliant model.
- Convection cooling rating is 40 Watts worst case (GNT60-12 @ 50°C)
